New York, NY

## PROFESSIONAL SUMMARY

Experienced Backend Developer with expertise in Java and Spring Boot. Passionate about optimizing database performance and building scalable microservices.

## EXPERIENCE

### Senior Backend Developer | Enterprise Solutions | Feb 2020 - Present

- Designed and implemented RESTful APIs using Java and Spring Boot
- Improved PostgreSQL query performance, reducing latency by 35%
- Developed microservices architecture to enhance scalability
- Integrated RabbitMQ for efficient asynchronous processing

### Software Engineer | DataTech Corp | Jul 2017 - Jan 2020

- Developed backend services using Python and Flask
- Implemented caching strategies with Redis, improving response times
- Worked with Kubernetes to deploy containerized applications
- Enhanced system security by implementing JWT-based authentication

## EDUCATION

Master of Science in Computer Science - MIT (2017)

Bachelor of Science in Information Technology - Harvard University (2015)

## SKILLS

Java, Spring Boot, PostgreSQL, Docker, Kubernetes, Redis, Flask, RabbitMQ

## CERTIFICATIONS

- Oracle Certified Java Developer
- AWS Certified Developer

## **LANGUAGES**

English (Fluent), German (Intermediate)

## **PROJECTS**

### **E-commerce Backend System**

- Developed scalable REST APIs for an e-commerce platform
- Optimized PostgreSQL queries for high-volume transactions
- Implemented JWT-based authentication for secure access
